

**WAMBO COAL
BLAST MONITORING RESULTS
1 JANUARY 2020 – 30 NOVEMBER 2020**

Published 10 May 2021

Environment Protection Licence Number: 529
Licensee: Wambo Coal Pty Limited, PMB 1, Singleton NSW 2330
Premises: Wambo Coal Pty Limited, Jerrys Plains Road, Warkworth NSW 2330

Wambo Coal has approval to blast in accordance with DA 305-7-2003 and EPL 529.

During the 2020 Calendar year Wambo Coal conducted a total of 61 blast events, all of which were monitored at EPL locations 10, 11 and 12.

EPL 529 outlines several specific conditions in relation to blast monitoring. These include;

- L6.2 - The airblast overpressure level from blasting operations in or on the premises must not exceed: 115 dB (Lin Peak) for more than 5% of the total number of blasts during each reporting period; at either monitoring point 10, 11 or 12 in Condition P1.3.
- L6.3 - The airblast overpressure level from blasting operations in or on the premises must not exceed: 120 dB (Lin Peak) at any time; at either monitoring point 10, 11 or 12 in Condition P1.3.
- L6.4 - The ground vibration peak particle velocity from blasting operations carried out in or on the premises must not exceed: 5 mm/second for more than 5% of the total number of blasts during each reporting period; at either monitoring point 10, 11 or 12 in Condition P1.3.
- L6.5 - The ground vibration peak particle velocity from blasting operations carried out in or on the premises must not exceed: 10 mm/second at any time; at either monitoring point 10, 11 or 12 in Condition P1.3

A summary of blast compliance is outlined in Table 1.

Table 1 Summary of Blast Compliance

Parameter	Criteria	Results Exceeding Approval Criteria					
		BM02		BM05		BM07	
		No.	%	No.	%	No.	%
Airblast Overpressure Level (dB Lin Peak [dBL])	115	0	0	2	3	1	1
	120	0	0	0	0	0	0
Ground Vibration Peak Particle Velocity (mm/s)	5	1	1	0	0	0	0
	10	0	0	0	0	0	0

Note: dBL = low frequency noise levels.

Less than 5% of all blasts recorded overpressure greater than 115 dBL, and no blasts resulted in overpressure greater than 120 dBL being recorded at BM02, BM05 or BM07.

Less than 5% of all blasts recorded a ground vibration greater than 5 mm/s and no blasts resulted in ground vibration of greater than 10 mm/s being recorded at BM02, BM05 or BM07.

From 30 November 2020, blasting conducted for open cut operations is managed by United under Phase 2 operations of the United Wambo Joint Venture.

Table 2 provides the monitoring results for all blasts that occurred at Wambo to 30 November 2020.

Notes - WCPL achieved a data capture rate of 100% for overpressure and 100% for vibration during the reporting period. Homestead (structural monitoring; BM01) and Harris (performance monitoring; BM03) monitors have been excluded due to not being compliance based monitoring points.
